#### To the Honorable Mayor and Members of the City Council:

Pursuant to the Tempe City Charter, the City Manager is to prepare and submit a Capital Improvements Program (CIP) annually to the Council. The CIP is a five-year financial plan for acquisition, construction, expansion, rehabilitation of infrastructure and capital assets. Capital Projects typically have one or more of the following characteristics: (1) expenditures which take place over two or more years, requiring continuing appropriations beyond a single fiscal year; (2) funding with debt because of significant costs to be shared by current and future beneficiaries; (3) a systematic acquisition over an extended period of time; and (4) scheduled replacement or maintenance of specific elements of physical assets.

Although capital projects are scheduled throughout the five-year plan, only those projects during the first year of the plan are adopted as part of the City's annual budget. The remaining years within the CIP serve as a guide for future planning and are subject to annual review and modification in subsequent years.

#### ANNUAL BUDGET PROGRAM SUMMARY

As shown in the following table, the City of Tempe's Financial Program for FY 2006-07 totals \$510.8 million. Of this amount, approximately \$196.7 million is for projects included in the Capital Budget.

FY 200	
Total Financia	l Program
Operating Budget	\$314.1
Capital Budget	\$196.7
otal (\$ millions)	\$510.8
	Operating Budget

#### CIP PROCESS

In mid-October, the CIP process began with the CIP Coordinating Committee meeting to review and discuss guidelines, budget request forms, and availability of funds. This Committee consisted of city department heads, departmental capital project managers, and members of Financial Services staff. Based on the guidance provided at this meeting, City departments submitted requests for projects to be included in the Capital Improvements Program.

After all the submissions were received, a follow-up 'discovery' meeting was held in late November. At this meeting the total requests were put in context of total available funding. Through meetings with department managers and other key department representatives held over the ensuing months, the total funded program was reduced to meet the available resources. Based on these meetings, a five-year capital program was recommended to the City Manager.

On March 23<sup>rd</sup>, the City Council held an initial public Issue Review Session to examine the capital program including funding sources, debt service requirements, operating budget impacts, and project priorities. Subsequent meetings were held April 5<sup>th</sup> and May 18<sup>th</sup> to further discuss the program, and make revisions and additions based on council priorities. The process culminated in the Council adoption of the Capital Improvements Program on June 15, 2006.

#### CAPITAL BUDGET OVERVIEW

The Capital Budget consists of the following program areas: General Purpose, Transportation, Special Purpose, and Enterprise projects. As shown in the table, the Special Purpose and Enterprise programs make up the bulk of the Capital Budget in FY 2006-07, representing 59% and 28% of the program, respectively. The Special Purpose program includes Transit and Rio Salado projects and totals \$115.6 million. The Enterprise program includes Water, Wastewater, and Golf projects, and totals \$56.3 million.

The General Purpose program includes Police, Fire, Parks, and General Governmental projects, and represents \$17 million or 9%, of the funded projects in FY 2006-07. The Transportation program

includes street and sidewalk construction/renovation, street signs and lighting projects. Transportation program funding totals \$7.8 million in FY 2006-07, representing 4% of the Capital Budget.

	(\$ Millions)	% of Tota
General Purpose	\$17.0	9%
Transportation	7.8	4%
Special Purpose	115.6	59%
Enterprise	56.3	28%
Total	\$196.7	

#### CAPITAL BUDGET HIGHLIGHTS

Following are highlights from the Capital Budget for FY 2006-07:

#### **Enterprise Program**

### Continued funding for Water projects (\$31.3 million) including:

- · Continued funding for expansion and membrane conversion at the Johnny G. Martinez Water Treatment Plant (JGMWTP) (\$19.0 million)
- · Continued funding for the Utility Services and Warehouse Building (\$2.5 million)

### Continued funding for Wastewater projects (\$25 million) including:

- Continued funding for 91<sup>st</sup> Avenue Wastewater Treatment Plant capacity expansion (\$21.6 million)
- · Continued funding for the Southern Avenue Interceptor Rehabilitation (\$2 million).

#### **Special Purpose Program**

### Continued funding for the Transit program (\$111.9 million) including:

- Continued funding for the Central Phoenix and East Valley Light Rail Transit planning, design and construction (\$58.4 million)
- Continued funding for the East Valley Regional Maintenance Facility (\$33.9 million)

Continued funding for the Tempe Transportation Center (\$13.1 million)

New funding for the Playa del Norte Park in the Rio Salado Program (\$3.6 million)

#### **General Purpose Program**

### Continued funding for the Police Protection Program (\$7.3 million) including:

- Funding for the Police/City Radio Replacement (\$2.6 million) and Computer Aided Dispatch (CAD)/Records Management System (RMS)/ Field Report Writing System (FRWS) (\$2 million)
- · Final funding for the Apache Boulevard Police Substation (\$2.5 million)

### Continued funding for the Fire Protection Program (\$1.1 million) including:

- · Continued funding for the replacement of Self Contained Breathing Apparatus (\$625 thousand)
- Funding for the replacement of a Fire Pumper Truck (\$420 thousand)

### Continued funding for the Park Improvements Program (\$1.2 million) including:

- · Continued funding for the development of Victory Acres Property (\$812 thousand)
- Continued funding for Neighborhood Park Improvements (\$250 thousand).

### Continued funding for the General Governmental Program (\$7.3 million) including:

- Funding for the expansion of the Police Department Chiller (\$2.5 million)
- · Continued funding for the Municipal Arts Program (\$1.3 million)
- · Initial funding for the renovation of the Tempe Historical Museum Exhibit Hall (\$926 thousand)
- · Initial funding for the renovation of the Tempe Public Library (\$628 thousand)

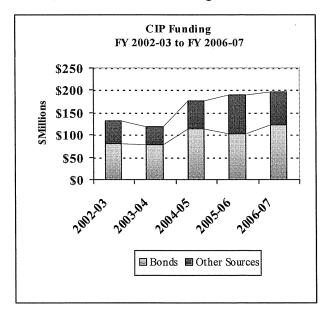

#### **Transportation Program**

# Continued funding for Transportation and Right-Of-Way improvements (\$6.7 million) including:

· Continued funding for local and major street renovation and reconstruction (\$3.8 million)

### CAPITAL IMPROVEMENTS PROGRAM FINANCING

Tempe's capital program has been historically funded through a combination of bonds and other sources, as shown in the following chart.

The other funding sources have included pay-asyou-go financing, outside revenues, grants and capital project fund balances. In the past three years' capital programs, an increasing amount of funding has come from bond financing.

In FY 2006-07, the program is funded with a combination bonded debt, which represents 62% of program funding, and a total of 38% from a combination of other sources as shown in the table on the following page.

These sources are described in further detail in the Capital Improvements Program Sources of Funds table in the *Schedules and Summaries* section, as well as in the individual project descriptions.

FY 2006-07 Source	ces of Funds	
	(\$ Millions)	% of Total
General Obligation/Excise		
Tax Bonds	\$122.1	62.0%
Pay-As-You-Go Financing	18.6	9.5%
Outside Revenue	47.6	24.2%
Capital Projects Fund		
Balance	8.4	4.3%
Total	\$196.7	

#### DEBT MANAGEMENT PLAN

The need to incur long term obligations to finance past, present and future capital programs carries with it the obligation to manage the debt program effectively. As a result, the level of outstanding debt and the City's capacity to incur and repay additional debt bear careful examination.

In 1989 the City Council adopted a long-range debt plan for the City. At the beginning of the capital budget process, the debt plan is updated using revised assessed value, population, and operating revenue projections. Through adoption of this plan and by utilizing these factors to size our debt program, the City has achieved and maintained outstanding bond ratings. Currently, Tempe's General Obligation Bond ratings are:

Fitch: "AAA" 11/00 Moody's: "Aa1" 4/97 Standard & Poor's: "AA+" 2/92

For fiscal year 2006-07, we plan to issue \$70.3 million of bonds for projects in the General Purpose/Transportation and Special Purpose programs. Over the five-year Capital Improvements Program, we plan to issue \$201 million in bonds for these purposes, all in accordance with our debt management plan. Debt service on these bonds will be repaid by revenues from dedicated excise taxes as well as the City's secondary property taxes.

In addition, we plan to issue approximately \$51.8 million of Enterprise Bonds in FY 2006-07 to finance a portion of the project costs in this program. Over the five year CIP, we plan to issue approximately \$138.4 million in bonds in the Enterprise program. User fees will support the debt service costs on these bonds.

#### CIP/OPERATING BUDGET RELATIONSHIP

Though the City of Tempe prepares a separate Capital Budget from the Operating Budget, the two budgets are linked. These links include operating and maintenance costs associated with new facilities, debt service payments for new debt financed projects, and pay-as-you-go financing from operating revenues. These impacts total \$24.8 million as shown in the following table.

Total Impact of Capital Budget on Operating Budget - All Funds					
	FY 2006-07				
New Debt Service					
Enterprise \$4,076,409					
Transportation	317,690				
General Purpose	1,278,513				
New Operations and					
Maintenance	508,822				
Pay-As-You-Go Financing	18,611,195				
Total	\$24,792,629				

As part of the Capital Improvements Program, departments were asked to identify those capital projects that have an impact on the operating budget specifically in terms of operation and maintenance. The table on the following page summarizes the projected operating and maintenance impact by project of the capital improvements on the operating budget for FY 2006-07.

As shown in the table on the following page, the finalization of the construction of the Apache Boulevard Police Substation contributes the largest operating cost, with \$396 thousand from the General Fund. This amount will provide for four new Full-Time Equivalent (FTE) positions associated with opening this facility in FY 2006-07. In general terms these costs relate to the hiring of personnel to operate the Substation, including administrative and custodial staff and one-time vehicle purchases. The other noteworthy operating impact relates to \$82 thousand from the Transit Fund for a Transit Maintenance Administrator to coordinate final the East Valley Regional construction of Maintenance Facility.

Program/ Project	\$ Amount	FTE	Fund
Special Purpose			
East Valley Regional Maintenance Facility	\$81,784	1	Transit Fund
Transportation			
Streetlight Upgrades/ New Installation	8,940		Highway User Revenue Fund
New Signals/Modular Upgrade	6,480		Highway User Revenue Fund
General Purpose			
Apache Boulevard Police Substation	396,698	4	General Fund
Tempe Public Library Renovation	5,000		General Fund
Renovation of the Tempe Historical Museum			
Exhibit Hall	9,920		General Fund

#### **CONCLUSION**

The five-year capital program serves as an excellent guide for future planning. In combination with the debt management plan its use will ensure the City's capital needs are met in a timely fashion with no impact to the City's continued financial stability.

In closing, the completion of a budget requires the effort of many people. To the Mayor, City Council, the City Manager, departmental managers and staff, and to the Budget Division whose efforts provided invaluable assistance to me in its preparation, I express my sincere appreciation.

Respectfully Submitted,

Jerry Hart Financial Services Manager

Under Article 9, Section 8 of the Arizona State Constitution, cities may issue general obligation bonds for purposes of water, wastewater, artificial light, open space preserves, parks, playgrounds and recreational facilities up to an amount not exceeding 20% of the secondary assessed value.

Cities may also issue general obligation bonds for all other purposes not included in the 20% Debt Margin category up to an amount not exceeding 6% of the secondary assessed value.

<sup>(1)</sup> The FY 2006-07 Bond Limit is based upon an estimated secondary assessed value of \$2,006,703,332, compared to the FY 2005-06 secondary assessed value of \$1,904,426,188.

#### **Debt Policy**

The objective of the City of Tempe debt management policy is to maintain the City's ability to incur present and future debt at the most beneficial interest rates in amounts needed for financing the adopted Capital Improvements Program without adversely affecting the city's ability to finance essential City services.

#### **Policy Statements:**

- Debt will only be used to finance long term capital improvements and not be used to finance recurring operating expenses.
- In accordance with state law, the total value of General Obligation bonds issued for the purposes of water, wastewater, artificial light, open space preserves, parks, playgrounds, and recreational facilities cannot exceed 20% of assessed valuation. The total value of General Obligation bonds issued for all other purposes other than those listed above cannot exceed 6% of assessed valuation.
- Debt term should match the useful life of the capital project funded.

- Debt service schedules will be based upon level annual principal and interest payments.
- Overlapping debt issue shall be included in the City's financial reports.
- Authorized debt shall be limited as follows unless authorization is obtained from the City council to exceed these limits:
  - General obligation bonds shall follow the guidelines established in the Debt Management Plan
  - Excise tax bonds shall maintain revenue coverage limits of at least 3 times debt service
  - Improvement District bonds shall not exceed 5% of the City's secondary assessed valuation
  - Short-term borrowing or lease/purchase contracts must be budgeted within the Operating Budget
- Benchmark ratios of per capita debt, debt service to operating revenue, and outstanding debt as a percent of full cash value will be updated regularly and incorporated into the Debt Management Plan.

The Enterprise component of the Capital Improvements Program consists of Water, Wastewater, and Golf programs. Combined, they constitute \$56.3 million of the \$196.7 million Capital Improvements Program for FY 2006-07. The City's capital budget for this area are driven largely by federal and state compliance requirements as well as plant capacity expansions. A total of \$52 million of Water/Wastewater Bonds will be sold to fund these projects in FY 2006-07. These bonds are paid for by user charges from their respective program activity.

Major projects in FY 2006-07 include: Water - continued funding for the Johnny G. Martinez Water Treatment Plant Expansion and Membrane Conversion, construction of a Utility Services and Warehouse building, and various waterline improvements; Wastewater - continued funding for 91st Avenue Wastewater Treatment Plant expansion and construction of a Southern Avenue Interceptor Diversion Structure; and Golf - funding provides for annual renovation and improvement projects at Rolling Hills and Ken McDonald golf courses.

This project provides funding for additional capacity at the Johnny G. Martinez Water Treatment Plant (JGMWTP) to meet the projected growth resulting from infill development, development of remaining vacant land, and re-development of existing parcels. This project includes a comprehensive site study, 15 MGD of new treatment capacity, a second 12 MG potable water storage reservoir and pump station, replacing gaseous chlorine with on-site generated Sodium Chloride, moving to Ultra Violet for primary disinfection, a new building for the Environmental Services work group, and improvements to the Marigold Lane entrance to the plant to enhance security.

#### **Utility Services & Warehouse Building**

#### **Project Description**

This project provides for design and construction of new facilities on the site of the Kyrene Water Reclamation Facility to house the Utility Services workgroup and the Water Utilities Department (WUD) Warehouse, which are currently housed at the JGM Water Treatment Plant campus. This will relocate these functions so they are more centralized to their customer base and out of principally residential neighborhoods.

This project funds the contruction of new water production wells to provide additional groundwater production capacity of approximately 13.0 MGD to the City system. Coupled with existing wells, the new well capacity will move us closer to the Department's groundwater production well capacity goal of 40.0+ MGD to meet the needs of an emergency situation and provide a supplemental water supply during times of drought. The wells also double as storage capacity reducing capital requirements for additional above-ground storage and pumping.

This project provides new security improvements and upgrades of existing components as recommended by the vulnerability assessment completed by federal mandate in 2002 for all water utilities departments. The project will focus on all critical infrastructure identified by the assessment. The infrastructure involved would be well sites, water production plants, wastewater reclamation, reservoirs and the Household Products Collection Center. The project will include an operations control center console to monitor the numerous cameras and access control systems that will be installed. In addition to security components, the project will include modifications or replacement of current perimeter fencing and lighting.

This project represents Tempe's share of all activities at the 91st Avenue Wastewater Treatment Plant (WWTP) including: capacity expansion projects, capital equipment replacement, modifications and additions to meet regulatory requirements, process enhancements and also rehabilitation of the jointly owned trunk sewer lines that convey wastewater flows to the plant. The 91st Avenue WWTP is a regional treatment facility that is jointly owned by five valley cities and is operated by the City of Phoenix. The 91st Avenue plant represents the majority of Tempe's wastewater treatment program.

#### Southern Avenue Interceptor (SAI) Rehab - All Phases

07/01/03

06/30/09

#### **Project Description**

This project funds the phased rehabilitation or replacement of the Southern Avenue Interceptor (SAI), a jointly-owned regional sewer that flows through Tempe. A recent study by Brown & Caldwell Engineers revealed severe corrosion of this unlined concrete sewer line. The study recommended a phased rehabilitation or replacement of this line to protect it from eventual collapse. This project combines all of the phases of the multi-year rehabilitation of the SAI into a single project. The project will be jointly funded by both Tempe and Mesa. At this time the split of costs is not known and Tempe is assumed to front the entire cost.

#### **Metering Station Improvements**

06/30/07

#### **Project Description**

This project provides for modifications to existing meter station access at the Priest Road Metering Station and the Southern Avenue Metering Station. Both of these metering stations require frequent access by Water Utilities Staff that require confined space entry procedures to be followed. Modifications will improve the access and safety of entry to the stations to allow staff to enter without entering a hazardous atmosphere. Modifications will also eliminate the need to lift samples into composite sampler, allowing for a more representative sample to be collected.

This project provides for construction of a facility to allow dewatering of solids following the wastewater collection system cleaning process. To comply with State and Sub-Regional Operating Group (SROG) mandates all solids must be separated and delivered to a landfill and only liquids returned to the sewer. The facility will be installed at the 48th Street SROG meter station.

The Special Purpose component of the Capital Improvements Program includes Transit and Rio Salado capital programs. Combined, they constitute 59% of the \$196.7 million Capital Improvements Budget for FY 2006-07. Both the funding and original authorization for the Transit projects in the Special Purpose program are a result of voter approved initiatives.

On September 10, 1996, Tempe voters approved a one half of one percent sales tax increase for transit improvements. Revenues from this voter approved tax, coupled with Federal grants for Transit projects, provide the bulk of funding for the Special Purpose program. The Rio Salado program relates to projects constructed within the district established around the Tempe Town Lake.

Major projects in FY 2006-07 include: **Transit** - continued funding for the Central Phoenix/East Valley Light Rail Transit System, a new Transportation Center and a new East Valley Regional Maintenance Facility; and **Rio Salado** - funding for the Playa del Norte Park.

This project provides funding for design, engineering and construction of 5.494 miles of light rail transit that would link downtown Phoenix and downtown Mesa to Tempe including Sky Harbor Airport and ASU. In addition, this project provides for obtaining necessary project rights-of-way. The major funding partners in the Central Phoenix/East Valley Light Rail Transit (CP/EV LRT) project are Phoenix, Tempe and Mesa. The cities are funding 48.38 percent of the capital cost of the project with a combination of local sales tax revenues, bond proceeds and other local sources. The balance will be funded with federal sources, including FTA (Federal Transportation Administration) Section 5309 New Starts grant funds providing 46.85 percent.

#### **East Valley Regional Maintenance Facility**

06/30/07

#### **Project Description**

This project will provide the local match in the design and construction of a cooperative multi-jurisdictional regional transit maintenance center located in Tempe. This facility is envisioned to serve transit contractors working for the City of Tempe, Valley Metro, and Scottsdale. This 250-bus operations and maintenance facility will include Administrative Offices, Operations/Driver facilities for over 500 bus operators, a Bus Maintenance building, bus canopies to provide shade for the buses while parked, and a full LNG/CNG Fueling Center with Fare Retrieval and Bus Wash. The design and construction of the facility will be funded by Tempe transit tax, City of Scottsdale earmarks, discretionary federal funding (5307/5309) and Proposition 400.

#### **Mid-block Crossing Treatments**

#### **Project Description**

This project involves the design and construction of up to six mid-block arterial street crossings at various locations throughout the city. The project intends to provide enhanced pedestrian crosswalks in locations that currently do not have a signal, a striped crossing, or any improvements to facilitate pedestrian access. The designs of these crossings may include the following: signing, striping, physical barriers, landscaping, signalization, and median refuges. Arterial streets with high transit ridership will be the focus of this project.

This project funds two miles of pedestrian improvements and traffic calming for a collector street. The project connects four schools and three neighborhood parks to ASU and downtown Tempe. The project crosses three arterial streets, connects to the College Avenue pedestrian bridge over US 60 and provides a corridor connection to the Metro light rail. The project will enhance the pedestrian environment, which may include the following: wider sidewalks, pedestrian lighting, increased landscaping and shade, narrowed vehicle space, bicycle lanes, public art and a variety of traffic calming devices.

#### Crosscut Canal Multi-use Path, Phase II

#### **Project Description**

This project will build a one-mile non-motorized path facility that will connect to the recently completed, award-winning 1.25 mile Crosscut Canal Multi-use Path Phase I. The project will include a paved path facility, landscaping, lighting, and a public art element. The project follows Salt River Project's Crosscut Canal through Papago Park and connects to Tempe's Canal and Moeur parks.

T.

The General Purpose component of the Capital Improvements Program includes Police Protection, Fire Protection, Storm Drains, Park Improvements, and General Governmental programs. Combined, they constitute \$17 million of the \$196.7 million Capital Improvements Budget for FY 2006-07. A total of \$11.3 million in General Obligation bonds will be sold to fund these projects. These General Obligation bonds are paid for by local property taxes. The balance will come primarily from transfers from other funds, fund balances, and other revenues.

Major projects in FY 2006-07 include: **Police** - final funding for the Apache Boulevard Substation, a new police radio system, and various computer assisted dispatch, report-writing and record-keeping systems; **Fire** funding for replacement of the Self-Contained Breathing Apparatus inventory and a new pumper truck; **Storm Drains** - continued funding for upgrades to various retention facilities; **Park Improvements** - funding for the continued development of Victory Acres Park and continued improvements to neighborhood parks; and **General Governmental** - continued funding for the Maryanne Corder Neighborhood Improvements Grant program, initial funding for renovation of the Tempe Historical Museum and the Tempe Public Library, funding for the expansion of the Police Department Chiller, and funding for the Municipal Arts Program.

This project will replace the City's existing analog radio system, which was implemented in 1988, with an interoperable digital system. This project provides for the replacement of outdated radio equipment for the Police Department and other City radio users and allows Tempe to participate in the establishment of long term public safety interoperability in the Phoenix metro area.

### **Apache Boulevard Substation**

#### **Project Description**

This project provides the final installment of funding for construction of a Police Substation and Property/Evidence Facility on Apache Boulevard. This Substation will house the North Patrol operations, Traffic, the Communications Dispatch Center, and all associated support functions. This project will meet the space needs of the aforementioned functions for the next ten years. The facility will also provide a state of the art Property/Evidence storage facility as well as additional space for Police vehicles.

### **TIPS (Technology Integrated Police System)**

7/1/2005

07/01/05 06/30/08

#### **Project Description**

This project incorporates new technology in the Police Department, and adds resources to upgrade and interface existing automated systems. Planned projects include the implementation of Police-specific Geographical Information System layers, computer based training applications, wireless infrastructure development, hardware for data storage needs, replacement of printers and other specialty hardware, software upgrades, and upgrades to the Police Identification Unit's digital dark room. This project also provides resources for unanticipated technology costs.

### **Police Department Chiller Expansion**

#### **Project Description**

This project will provide redundant cooling capacity for the Municipal District cooling loop, which currently serves City Hall, Police/Courts buildings, Performing Arts Center and the 525 Building. The proposed site for the cooling plant is on the west side of the existing Police/Courts parking structure. The new plant would contain two (2) - 200 ton chiller systems for the redundant cooling capacity. This facility will have space available for one (1) additional chiller system, which could allow the new Transit Center to be added to the municipal loop.

#### **Project Description**

This project was originally developed to provide funding to preserve the structural and aesthetic value of four city owned historical properties. Additional properties have been identified as having historical value (Tempe Beach bridge abutment and Tempe Beach ball field bleachers). These properties were determined by the Historic Preservation Commission to be of historical value and should be maintained as such for future enjoyment by the public.

The Transportation element of the Capital Improvements Program comprises Transportation and Right-of-Way Improvements and Traffic Signals/Street Lighting programs for the City. Combined, they constitute 4% of the Capital Improvements Budget for 2006-07. A total of \$7.6 million in General Obligation bonds will be issued to support these projects. The balance of funding will come from Federal grants and various fund balances.

The 2006-07 Capital Improvements Budget provides for: **Transportation and R.O.W. Improvements** - continued funding for local and major street renovation and reconstruction, minor concrete improvements, and assorted other streets projects; and **Traffic Signals-Street Lighting** - continued funding for new signals/modular upgrades, utility undergrounding, streetlight upgrades/new installations, and antique street sign replacement.

**Ongoing** 

**Ongoing** 

#### **Project Description**

This project provides for the reconstruction, resurfacing, and rehabilitation of isolated and/or small groups of streets that have exceeded their design life or that were never part of the city's street system. Streets and/or public rights of way in this category include streets that were acquired through annexation processes throughout the years, and streets/rights of way that have never been constructed to city standards. Improvements are necessary in areas to ensure accessibility and safety for residents and businesses adjacent to these areas, pedestrians, bicyclists, and vehicular traffic.

### **Arterial Resurfacing**

#### **Project Description**

This project provides for the resurfacing and localized reconstruction of the arterial street system in the City. The majority of the arterial roadways in the City have undergone numerous preventative maintenance applications since originally constructed. These applications have raised the original grade of the roadway and in some cases compromised the safety of the roadway by reducing the curb height. The amount and type of traffic has exceeded the design limit of many of the arterials. By overloading a roadway past its original design, rapid deterioration of the street will result. By resurfacing the arterials with a rubberized asphalt overlay, the strength and the durability of the roadway will greatly increase while the cost of maintaining the road for the next 10 years will decrease.

2006-07	2007-08	2008-09	2009-10	2010-11
\$26,057	\$66,480	\$33,146	\$124,300	\$62,180

This project will provide for the improvement or dust control of minor streets and alleys throughout the City, including paving unpaved streets or upgrading of substandard minor streets to City standards. The paving of these streets and dust control in the alleys will assist the City in meeting its air quality standard requirements. Alleys that have been improved provide an environment that allows the solid waste personnel to complete their duties safely and quickly as well as encourage residents to take ownership of their alley and increase neighborhood pride.

### **Street Light Upgrades/New Installation**

#### **Project Description**

This project provides for the installation of new street lights at various locations as well as the upgrading of streetlights from mercury vapor luminaires to high pressure luminaires. A typical year's program would include installation of 200 new arterial street lights, 50 mid-block residential lights and five alley lights in high crime areas.

The project will fund the replacement of existing rusted street light poles that are direct buried and provide funding to replace all direct buried street light poles to meet our current street light pole foundation standards. It is estimated that there may be 3,000 rusted street light poles in our inventory which may increase because of corrosion over the next ten years.

Even though the budget is heard by the Mayor and Council in March, April, and May, its preparation begins several months prior, with projections of City funding sources, remaining bond authorization, reserves, revenues, and expenditures. It continues through numerous phases and culminates with adoption in June. We recognize and appreciate that budgeting is an ongoing process of planning, monitoring, problem solving, and customer service throughout the fiscal year. Each year, every effort is made to improve both the budget process and the usefulness of the budget documents.
